

SLA DROP-IN SESSION - FRIDAY 3RD FEBRUARY, 11.00AM – 3.00PM

An opportunity to discuss the services offered by the Schools Technology Support Centre

Gavin Hawkins Tel: 01902 550635

The Learning Technologies Team has developed a service that promotes strategic partnerships with schools, academies and other educational establishments. The work of the team was recognised as the best in the UK when it won the BETT Award for ICT Service and Support in 2013 and were finalists again in 2016. We aim to support schools to:

- Raise achievement through the use of technology, linked directly to school development plans
- Meet the statutory requirements and improvement targets of the new computing curriculum
- Support school workforce development through CPD and expert consultancy
- Promote the use of technology to support the needs of all learners
- Facilitate different models of curriculum delivery
- Enhance employment opportunities by developing learners' digital literacy
- Meet the Ofsted Framework for School Inspection

Neil Beard Tel: 01902 551476

The ICT Technical Support SLA provides support across the following focus areas:

- Strategic – Advice & Planning
- Design – Secure & Flexible
- Transition – Making the right changes
- Operation & Delivery – Quality procedures and techniques.

The ICT Technical Support Service provides an in-depth service that delivers a reliable, robust and secure digital infrastructure for your school. This enables your establishment to grow and develop with available technology now and in the future. The service adapts to meet your schools needs and works closely to align with schools development plans.

Jo Woodcock Tel: 01902 554223

The SIMS Support Team will work closely with schools to support and develop the use of SIMS. The SIMS system can be used to identify the achievements of individual pupils and key target groups, enabling a school to plan and respond appropriately to areas of strengths and weakness and ultimately raise standards in schools.

Working in partnership we ensure that the SIMS system meets the schools own internal data requirements underpinning school improvement and helping to raise attainment.

Data Support SLA

The Data Management service reduces the burden of transforming data into valuable management information. The service offering is flexible to ensure we meet the needs of your school or academy. A data support officer, with expertise in the use and analysis of SIMS data, works on your site for half a day a week, or for an agreed specified period of time.
